# ABOUT THE BUILDER

– STUART INGLIS –

I began building canoes after we started our family.

I wanted to provide our boys a means in their life  
to slowly, quietly immerse themselves in nature.

To feel the rhythms of wind and water.

I love to work with wood and build something as useful and  
beautiful as a canoe for other people to enjoy, to help you make  
wonderful memories, and basically 'get off the pavement' for a while.

**I'd be honoured to build one for your family.**

*I had Stuart make me a cedar strip canoe. It was beautiful,  
made with pride and attention to the smallest detail. Strapped to the  
top of my car on the way to my cottage, stopped at a red light, the  
driver in the adjacent car offered to buy it from me at the  
intersection. I turned him down!*

– Dr. Keir Stewart –

*Look how iridescent the roasted curly maple decks  
stand out, and check out the spotted alder carry handles.  
This detail is our 'signature' (below).*
